

JACK KNIGHT

PRESS RELEASE

JKD Releases New 5 Speed for the Classic Mini
Jack Knight is proud to announce the release of a new 5 speed Straight Cut Dog gearset that will fit in a standard mini gear case.

Moving with the times Jack Knight goes On Line

A new web shop is also being released next month. With special offers helping to drive the costs of motoring on all the British classics and the range of products are planned to expand during 2007

Jack Knight Developments have been designing and manufacturing automotive components since 1952.

Following on from the success of the original 5 and 6 speed range of mini gearboxes, which used a non standard case we are now able to offer a 5 speed to fit the standard case but retaining the strength and performance of the original design.

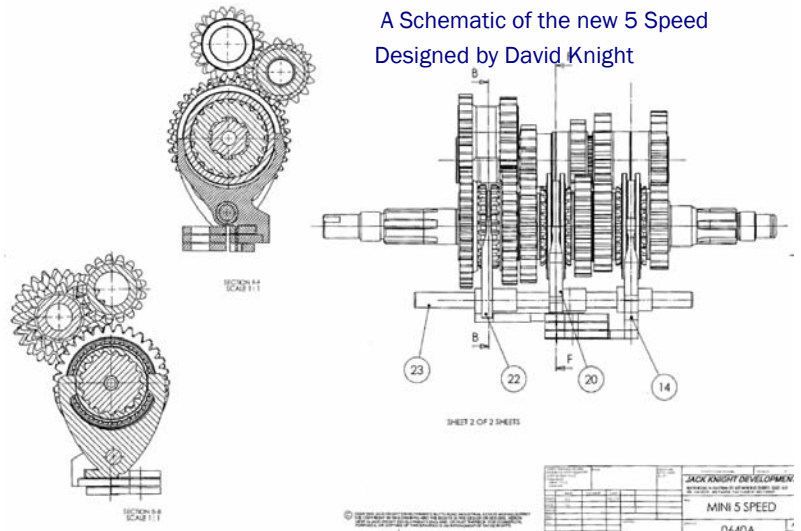

Test results were exciting and exceeded our expectations. The repositioned gears increase the strength of both the main and lay shafts.

Release date is the end of November and orders are now being taken, order early to avoid disappointment

To celebrate the release of the new kit and the launch of our web shop we are offering:

Order a kit on line and we will rebuild your gearbox for £150, less than half the normal price.
